

# MINOR IN FOR NON-ECON MAJOR UNDERGRADUATE STUDENTS ECONOMICS

Students who are not enrolled in a Discipline Major in Economics of BSocSc Programme may qualify for a Minor in Economics after successful completion of 15 credits (5 courses).

I allocated all of my time towards furthering my knowledge and skills by relentlessly studying the finance industry and its professionals. The broad based and sophisticated knowledge I learned in the economics courses for my minor expanded my horizons and better facilitated my ways of understanding in financial markets. I proactively chose mathematics and econometrics courses in Economics to build and enhance my quantitative, analytical, and professional skills. The quantitative courses have laid a solid foundation for me to improve my ability in quantitative financial analysis and to take a “deep dive” into researching any company’s financial performance.

— HUANG Yijun, BBA

(Awardee of the Best Economics Minor Students Awards in AY2019-20 and AY2020-21)

## STUDENT SHARING

“Before I choose to minor in economics, I would have thought of economics as a functional discipline. However, after minoring in economics, I found it fascinating because it could create, transform, and realize different values in different thinking modes. Understanding economics has been a fascinating learning experience for me. Through the studies in Economics, I now understand that economics is not just about supply and demand, but much more than that – it is a social science which involves the study of production, distribution, and consumption of goods and services, focusing on behavior and interactions of economic agents and economies. These concepts not only improved my qualitative and quantitative thinking patterns, but also brought me a different perspective on understanding the world.”

— DAI Jinyu, BBA

(Awardee of the Best Economics Minor Students Awards in AY2020-21)

As a liberal art university, students are encouraged to explore as much as possible across different subjects. I think Economics is closely related to our social and daily life, such as consumer behaviors, marketing strategies of a company and public policies. A variety of economic courses offered by the Department of Economics provides a comprehensive picture of the global economic trends which helps us to understand more about how the economy works as a whole. As an Arts students, we have plenty of opportunity to write and read. The training offered by economics equips me with the ability to Interpret numbers, graphs and tables which enhances my rational sense and analytical skills as well.

— CHEUNG Mo Ching, Arts

## THE BEST ECONOMICS MINOR STUDENTS AWARDS

To encourage non-economics major undergraduate students to choose economics as their minor programme, the Department of Economics established “The Best Economics Minor Students Awards” for Lingnan full-time non-Economics undergraduate students who have obtained or are expected to obtain average **GPA3.33 (B+)** or above in at least three economics courses (9 credits) offered by Department of Economics in Term 1 each academic year.
